EXPERIENCE

Meta

2021 – Present

Senior Product Designer | Core Ads Growth org — Designing AI-powered advertising products serving millions of businesses

Advertiser Verticals (eCommerce-focused)

2024 – Present

- Drove design for Meta's **unified ad campaign builder** — merging two separate eCommerce advertising flows (static ads and catalog-based dynamic ads) into a single AI-automated experience used by millions of businesses
 - Redesigned the **targeting and conversion setup** — launched targeting to 50% of advertisers (**1.6% increase in audience reach**) and conversions to 100%, directly unblocking a cross-channel commerce launch worth **\$150M+ in annual revenue**
 - Led design for integrating **product media into the new creative framework** — enabling catalog-based advertisers to leverage the unified ads creative experience for the first time, bridging product feeds with the broader multimedia ad builder
- Led design execution for **AI-powered Search Ads**, a 0→1 product — created 10+ end-to-end concept flows, drove a 3-phase research strategy with a design brief, and secured leadership sign-off for a 2027 alpha launch
- Led the 0→1 design strategy for **WhatsApp Ads** — defined the end-to-end advertiser experience across 4 campaign types, from identity selection to creative and placement. Drove cross-functional alignment with WhatsApp and Ads leadership, resolved critical launch blockers, and shipped globally to all eligible advertisers — surpassing adoption targets
- Led 8 designers to audit **64 usability issues** across a high-revenue ad flow (40% of catalog ad revenue), resolving 21 tasks within SLA — highest completion rate in the org

Advertiser Automation

2023 – 2024

- Designed and launched **7 Advantage+ Shopping features** — Meta's AI-automated campaign product for eCommerce — reaching **32.8% adoption** (exceeding the 26.9% goal), including value optimization (~\$700K daily revenue, 30% WoW growth) and cost-per-result goals (\$2.5M daily revenue)
- Led a **cross-org product redesign** spanning 3 organizations and 8 teams to create a more cohesive advertising experience — redesigned catalog entry points, introduced flexible conversion locations for Sales campaigns, simplified targeting from a multi-step flow to a single progressive view, and devised a 3-phase migration strategy to safely transition **~41% of dynamic ad revenue** (\$850M yearly) to the new model across 12K advertisers
- Designed **Audience Reporting** — a new analytics tool giving advertisers visibility into who their ads actually reach — across 5 surfaces with 50+ components, adopted by **40K accounts** (22% of daily revenue). Validated through 2 rounds of interviews with customer success managers across 4 global regions

App Ads & Privacy-Preserving AI

2021 – 2023

- Led product design for Meta's **privacy-preserving ad measurement system** — a framework that lets advertisers track app campaign performance without accessing individual user data. Drove app re-engagement ads to **\$6M daily revenue** (record high) and app install campaigns to 90% launch with a **9.5% increase in conversions**
- Designed usability improvements for **Apple's SKAdNetwork integration** — Apple's privacy framework that limits how advertisers measure iOS campaigns. Reduced campaign creation time by **3.74%**, improved error guidance across 175K+ occurrences, and shipped a faster reporting window that outpaced Snap and Twitter (**\$2.49M past-90-day revenue**)
- Owned **A/B Testing for automated app campaigns** end-to-end — designed the full split-testing flow, built 2 prototypes for user research, and launched to 100% with 130 monthly active advertisers. Also launched the **App Setup Tool** MVP, driving +4.5% app ads revenue and unblocking 761 apps to run ads within 21 days

Metaplug

2019

Product Designer — Early-stage startup connecting micro-influencers with brands through AI-powered discovery and analytics

- Redesigned the full desktop platform — Onboarding, Discovery Reports, and Team Management — to streamline influencer search and analytics
- Proposed and shipped upgraded user flows for brands and influencers, improving engagement and reducing onboarding friction
